

# Adams County Genealogical Society

## Research Database Update!

We are beginning a new database to help our members connect better with one another. The goal of this database is two-fold. First, as we continue to learn more about our Adams County ancestors, we often run across information that could be valuable to the research of our members, and we would like to pass it along! Secondly, this will allow us to put researchers in contact with one another better when researching the same families. This might help solve some of those brick walls!

You may update your record in our database as often as you would like. Information to include might be full name, spouse, birth/death/marriage dates, country or state of birth, etc. This is a database, so try to be as concise as possible, yet still provide enough information for other researchers to assist you in your journey. This database will primarily be SURNAME driven, so please keep that in mind when providing your information.
